

EXTENDED HORIZONS

NATURALIST LED DIVING

NOW HIRING

DATA & SYSTEMS ENGINEER

ENTRY LEVEL · CONTRACT · MAUI, HAWAI'I

Extended Horizons, a Maui based dive company since 1983, is seeking an entry level data and systems engineer to help build, integrate and maintain the AI and data systems that support our daily operations. This role works under the direction of our existing technology team, with room to grow.

RESPONSIBILITIES

- Help solidify and document the AI workflows and agent setups we run on Claude and OpenClaw
- Maintain our second brain knowledge system and the databases behind it
- Build integrations between our AI tools and our booking and communication platforms
- Help keep our self hosted business tools and servers running and up to date
- Build small internal web tools and guest facing guides, and make updates to our website and online booking listings
- Support staff with AI tools and troubleshoot day to day issues

QUALIFICATIONS

- Hands on experience in software, data or systems work, through projects, coursework or early jobs
- Working familiarity with databases, APIs or Linux servers
- Experience using AI tools such as Claude or OpenClaw; building with them a plus
- Some experience with Git, web apps or WordPress a plus
- Comfortable taking direction and working through problems on your own
- Clear written communication, including explaining technical work to non technical staff

POSITION DETAILS

- **Entry level contract,** available to start immediately
- **Flexible hours** based on our current needs, with room to grow into a larger role for the right candidate
- **Maui local preferred;** remote considered for the right candidate
- **Well suited** to someone early in their career in AI systems or software engineering

HOW TO APPLY

Send a brief introduction, examples of your work, and a link to your GitHub or portfolio to admin@extendedhorizons.com.
